Airflow Active Comfort

ADJUSTAMATIC
COMFORT YOU CONTROL

AirFlow Active Comfort

The Adjustamatic Airflow Active Comfort is a mattress like no other. It's unique design has been a work in progress for over 50 years, the product of which is a perfect combination of castellated zonal memory and medical grade high density foams.

The AirFlow Active Comfort mattress is cleverly designed so the castellated sections are divided into multi zonal areas for the head, core and foot. This helps reduce pressure of the neck, shoulders, back, hips and knees to improve posture, help relieve aches and pains and improve comfort while you sleep. It also helps to promote active airflow, keeping the sleeping surface supportive and cool aiding restful sleep, so you are not only supremely comfortable but you are also fully supported.

At Adjustamatic we believe that when you sleep better, you live better.

Key product benefits

- Air flow channels that aid mattress surface cooling
- Zonal support delivered through head, core and feet sections
- Individual comfort cell surface provides full body support
- Active comfort layers feature reactive zonal memory foam cells
- Pocket spring system from high density 1.7mm steel coil
- Contemporary luxury quilted mattress cover
